Toban Wiebe

January 2016

This is the abstract of the paper. Maybe there's some math in it: $\mathbb{E}[X] = \int x dF$. Lorem ipsum dolor sit amet, sed fabellas salutatus voluptatum ei, feugiat ornatus singulis pro ut. Rebum iuvaret concludaturque mei no, et putent propriae has. Eum ei dolorem voluptaria intellegebat, te mei mollis theophrastus, vim ne hinc magna appareat. Audiam accusam ad mei, nibh meis vim ne.

1 Introduction

Lorem ipsum dolor sit amet, vis id dolores albucius perfecto, ex mel unum vidit voluptatibus, altera phaedrum mea ut. Latine docendi mel ei, inermis delicata cu vis. No pertinax iudicabit usu, vis molestie corrumpit ex. Pri cu oblique legendos, an nullam meliore reformidans sed. Quo id ferri lobortis.

Cu est deleniti cotidieque. An ius enim legimus praesent, eu wisi adipiscing vel. Sale dolor necessitatibus eu mel, hinc fabulas necessitatibus ne pro. At facete hendrerit sit, labores repudiandae ullamcorper id vix.

2 Literature

Citing some papers Axelrod and Hamilton (1981) and Rothschild and Stiglitz (1976).

3 Model

The Standard Normal ¹ distribution has density function $\phi(x) = \frac{1}{\sqrt{2\pi}} e^{-\frac{x^2}{2}}$ and distribution function

$$\Phi(x) = \frac{1}{\sqrt{2\pi}} \int_{-\infty}^x e^{-\frac{s^2}{2}} ds.$$

¹See Claim 1.

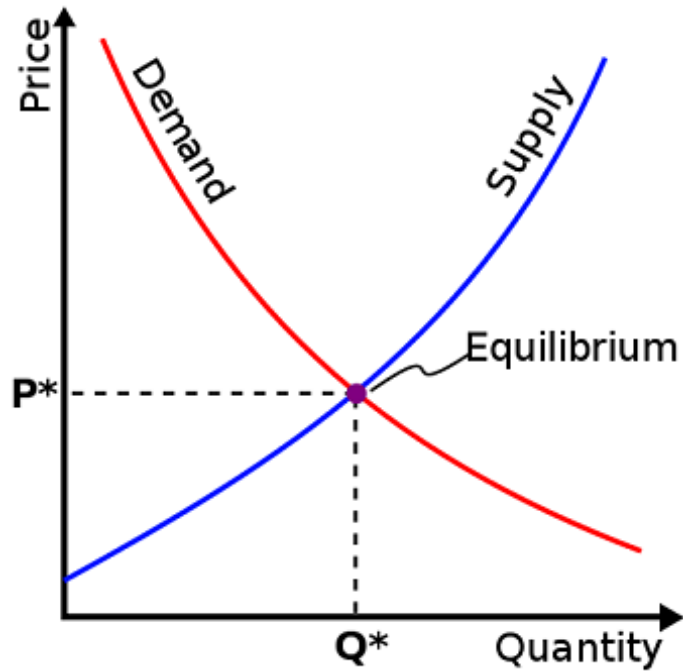

Figure 1: The results

4 Results

Figure 1 shows the equilibrium.
